

Pre-Planning for Earth Rangers Action Project

Before you start your Action Project, please discuss the following with your students and fellow teachers:

# of staff on-board to assist with project (teachers, principal, custodians, parents, volunteers)	
# of students involved in project (student leaders, other classes, eco-club)	
# hrs/week, months/year participants are willing to commit to project	
What time of day is best for everyone to meet? (class time, lunch, after school)	
Is there one location where you can meet regularly?	
Is any funding available from your school for your project or will fundraising be necessary?	

Consider obstacles you may encounter and outline a plan to address them (i.e. time constraints, permission, funding, materials, maintenance, participation)
