Energy Patrol Worksheet

Supervising Teacher/s: _____
School: _____

Before starting the campaign, decide:

- Which rooms will be included in the patrol. You can patrol in as many or as few as you like.
- How often you will be conducting the energy patrol: daily, weekly, or monthly.

During the patrol:

- This energy patrol will only cover sources of light and will include all overhead lights, desk lamps, and emergency exit signs.
- Each light source will have its own entry within the chart below. The information recorded for each light includes: the type of light (incandescent or fluorescent), wattage, the number of lights and how long each was left on.
- The first of your energy patrols will act as a baseline audit and all consecutive follow-up patrols will be compared to the previous patrol.

Once you have completed each patrol, submit your results at www.earthrangers.com and find out how much carbon your school has saved!

Date	Classroom/ room #	Type of light	Wattage	# of lights left on	# of hours left on
